

Disconnections and Cut Back Management

Following deregulation of the utilities supply markets the process of managing disconnections has become complex and time consuming. More meter providers and invisible distribution companies means this task needs experts.

Apogee draws on decades of experience providing an end to end disconnections and cut back management service. Our clients provide scheme details and meter numbers for meters that need removing including MPANs and MPRNs where possible.

A Fixed Fee service that includes regular reporting to the client's requirements as well as documentary evidence of the site having been cutback to the boundary of the scheme site. All meter companies and distribution companies covered including gas, water electricity and telecoms. Where needed and possible supplies can be retained or managed to provide Temporary Builders supplies.

Suitable for:

Solicitors, Clients and Project Managers.
Developers, Local Authorities Consultants, Architects, Design & Build Contractors, Contractors, Highways scheme promoters and Surveyor.

What our clients are saying (originals available):

- "We were given some advice where a complex situation existed"
- "We use Apogee for all our property needs"
- "We have no hesitation in recommending Apogee or this kind of work"
- "Very pleasing was that it was clear that the plans had actually been checked"
- "Its clear Apogee are taking searching to a new level"
